# Flex Seal™ Rubberized Emulsion Aggregate Slurry (REAS) - Central Mix

## From Neighborhoods to Highways

### AWARD WINNING, PROVEN PERFORMANCE

- Innovative technology
- Thousands of lane miles in service
- Used by numerous highway & street departments
- Formulation certified by wet track abrasion test
- Surveys show property owners approve; 94% agree it increases neighborhood pride
- Numerous federal, state & county awards
- Lasts 5-7 years or longer

### CENTRAL MIX ENVIRONMENTAL BENEFITS

- 2,593 waste tires are recycled for every 10 miles of streets slurry sealed
- Eliminates campsites in neighborhoods
- Reduction in dust
- Reduction of noise pollution
- Eliminates noxious odors during on-site mixing of materials

### CENTRAL PLANT PRODUCTION

- Rubberized polymer modified emulsion (RPME) tank
- Precise quantities
  - Mixing tank on load cells
  - Precise gradation control
- Ribbon blending agitators
- Storage tanks for up to one week
- Delivered ready to apply
- Quick, quiet, clean construction

### EXCELLENT QUALITY CONTROL

- Pre-Mix Slurry Testing and Quality Assurance
  - Test strips pre-tested for proper mix designs
  - Pre-mix slurry tested continually by Department of General Services Materials Testing Laboratory
  - Testing ensures consistent quality control & performance
